

LONDON CAPITAL MARKETS FORUM IN TEXAS

Date: April 2017

By: Tom R. Wallace, Bryce D. Linsenmayer

At this event, Cantor Fitzgerald, FTI Consulting, K&L Gates LLP and London Stock Exchange discussed how AIM can be a capital raising venue for US businesses. Each seminar offered an opportunity to speak with leading institutions in this space and topics covered included:

- Trends and projections in the global capital markets
- Connecting US businesses to a global investor audience
- Raising funds through the London capital markets and a discussion of successful case studies

The Alternative Investment Market (AIM) of the London Stock Exchange remains the world's most successful growth market. AIM offers US companies the opportunity to access high quality institutional capital at smaller market cap ranges, at much lower cost, and with a regulatory burden more tailored to their size and maturity than US exchanges.
