OVERVIEW

Rob Pulham is an experienced corporate advisory and transactional lawyer with an active technology and privacy practice representing companies in the energy, manufacturing, mining, retail, health and financial services sectors, as well as government and not for profit organisations. He has extensive experience advising customers and vendors in the technology industry, with particular focus on software licensing, data privacy and protection, and systems integration projects. In his role as a senior corporate lawyer, Rob reviews organisational policies and practices regarding data privacy to identify key risks, develops and implements strategies to mitigate privacy and cybersecurity risks, and advises clients in the investigation of, and response to, data breaches.

Rob also serves as a strategic advisor to his clients, regularly advising on large outsourcing and technology procurement matters including negotiating software licensing terms with ERP and CRM vendors such as Oracle, SAP and Salesforce, and on major systems integration transactions. He advises his clients on all facets of their technology practices, procurement and needs, including key technology procurement requirements and licensing issues (acting for both customer and service provider clients), marketing and advertising in compliance with Australian competition and consumer laws, website content and terms of use, and general commercial intellectual property and software licensing matters.

PROFESSIONAL BACKGROUND

Prior to joining the firm, Rob spent many years at a top tier national Australian law firm, working primarily in the firm's intellectual property and technology team. He has also gained valuable in-house experience working on various substantial client secondments including with the Victorian Bushfires Royal Commission, and with clients in the banking, food and beverage manufacturing and health sectors.

REPRESENTATIVE EXPERIENCE

- Advising several clients in relation to procurement of Microsoft cloud-based software solutions and the impact of Microsoft's standard Australian contracting terms on the particular client's circumstances.
- Advising the largest generator of renewable energy in Australia on an ERP system including conducting parallel negotiations with enterprise software vendors (Oracle and SAP) for the software solution, developing the SI sourcing strategy and leading the SI services negotiations (which included a three vendor shortlist to meet our client's particular requirements).
- Advising the retail arm of an Australian energy provider in relation to negotiation of a Systems Implementation and Outsourcing Agreement and proposed software and services agreements for the blueprint, design and implementation (by Accenture) of their CRM/ERP Customer Experience Project using Salesforce CRM software and Accenture analytics software, including preparing the implementation services agreement and leading simultaneous negotiations with the two system implementor vendors (Accenture and CapGemini) and leading negotiations with the software vendor (Salesforce) as well as Accenture for its analytics solution.
- Reviewing privacy practices and policies for various clients and advising on required amendments to comply with recent reforms to the Privacy Act.
- Providing various advices to an Australian charity in relation to its privacy practices, including: o the adequacy of its agreements and processes to be adopted for conducting fundraising campaigns with the assistance of third parties, including issues regarding transborder data flows o collecting personal details and sending cards to individuals on behalf of other individuals o general spam and privacy issues regarding direct marketing via email using personal information collected from donors.
- Advising a health service provider in relation to the inadvertent disclosure of emails containing personal information of one individual to a separate individual.
- Advising a national healthcare provider in relation to its negotiation of terms for the design, provision and implementation of a cloud-based relationship management system.
- Conducting privacy presentations and training for a reseller in the Victorian utilities sector and assisting the reseller in designing its privacy reform project.
- Guided a Victorian government property development agency concerning its general privacy obligations under the Information Privacy Act 2000 (Vic) and the Health Records Act 2001 (Vic). Provided detailed advice about what impact the proposed use of cloud computing solutions would have on the agency's privacy obligations. Instructed client on its privacy obligations for promotional projects and information collection forms. Drafted general privacy policies, and privacy policies specifically in relation to telecommunication carrier licence obligations. Advised in relation to Victorian Privacy Commissioner audits.
- Assisting a Western Australian utility organisation to address aspects of its privacy reform project.

- Conducting due diligence reviews of organisations' information and communications technology spend, licences, services agreements and technology requirements, and advising clients on key risks in seeking to acquire or divest those organisations.
- Advising a Victorian state sporting club on compliance with privacy requirements when collecting and processing personal information provided to or from its associated clubs in relation to a software application being developed for use by supporters and other individuals associated with the clubs.
- Advising and negotiating agreements for a client in the online education sector in implementing an online customer relationship management system with Salesforce.
- Assisting business units and procurement teams at one of the major Australian banks to acquire technology systems and services, including website and applications development agreements and compliance with privacy laws, as part of secondments to the bank's internal technology legal team.
- Presenting to clients and industry, and advising a large number of clients, about the effect of the changes to the Privacy Act 1988 (Cth) in March 2014, which were the most significant reforms since the Privacy Act was extended to cover the private sector in 2001.
